Globexco

YOUR PARTNER FOR SUSTAINABLE TRADE

CSR Charter

07/12/2025

Commitments

Our CSR Commitments

For our customers & end users

“We work with our customers to build a more responsible world”

At Globexco, we support each of our clients in the rigorous and personalized selection of resources, materials and products combining durability, energy efficiency and minimal health impact. We offer the guarantee of a resilient and traceable end-to-end value chain, limiting the impact on health and the environment.

- Selection of products combining durability, energy efficiency and reduced emissions of volatile organic compounds (VOCs) and particles.
- Traceability guarantee for our supplies and our value chain.
- Progressive integration into the catalog of bio-sourced materials free from toxic substances.

Our CSR Commitments

For our suppliers

“We cultivate sustainable and innovative partnerships”

We regularly assess our suppliers to ensure the safety and reliability of our operations and support our partners in adopting innovative and responsible practices.

- Transparent evaluation of our suppliers and support in their innovation and continuous improvement processes.
- Promotion of partners with the most responsible practices.

Our CSR Commitments

For our logistics partners

“We optimize our logistics and transport patterns across the entire value chain”

At Globexco, we are committed to more responsible logistics and transport, ensuring agile and resilient door-to-door delivery while limiting our environmental impact.

- Regular measurement of our CO_2 emissions to guide targeted reduction actions.
- Selection of carriers offering low-carbon, hybrid, or innovative solutions (such as sail-powered transport).
- Optimization of container filling by coordinating schedules to minimize empty trips.

Our CSR Commitments

For civil society

“We practice ethical trade and respect for human rights”

Our supply chain strictly excludes any partner that does not respect human rights. We build our business relationships on mutual transparency and respect, ensuring that our social commitments are clearly shared and respected.

- Involvement of all our suppliers in a responsible purchasing approach with precise social commitments.
- Promotion of ethical trade, in accordance with the principles of the World Trade Organization (WTO).

Our CSR Commitments

For the environment

“We integrate the protection of natural resources into our development”

Aware of our environmental responsibility, we are committed to reducing our direct and indirect impacts: from digitizing our invoices to choosing decarbonized solutions and infrastructure that preserve natural resources as much as possible.

- Gradual implementation of a measurement system for direct and indirect CO_2 emissions to better guide our reduction actions.
- Selection of sustainable warehouses and use of high energy-efficiency equipment from our partners.
- Active promotion of decarbonized transport modes.

Claim

Your partner for sustainable trading

Globexco

Purpose

“Globexco exists to build, with its clients and partners, more responsible global value chains, respectful of people and natural resources”

Manifesto

Globexco

OUR COMMITMENT TO MORE RESPONSIBLE TRADING

Extraction of natural resources has tripled in 50 years, at the cost of a heavy environmental and human impact.

Thus, 60% of global greenhouse gas emissions are today linked to the extraction and processing of materials.

In a world in search of sustainable cities, more sober infrastructure and social justice, maintaining current practices is no longer an option.

At Globexco, we rethink and disseminate the practices of a more responsible international trade.

With our customers, suppliers and partners, we are committed to limiting our footprint:

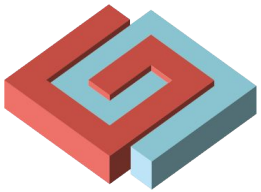

- by acting from the sourcing of resources, materials and products,
- by optimizing logistical flows and transport,
- by promoting more transparent and resilient sectors.

Our ambition? Make trade a lever for more sustainable production and consumption.

Globexco

Because acting on trade means having a lasting influence on the way we produce and consume.
